

**FLEET iQ**

An advanced GPS fleet tracking solution that provides visibility and insight over your assets and workforce in near real-time

# What is Mitsubishi Motors Fleet iQ?

Mitsubishi Motors Fleet iQ's GPS tracking solution is a web-based fleet management platform that collects data from your vehicles. Advanced software analytics transform the raw data into actionable insights, enabling visibility of your mobile workforce and helping you to better run your business.

Near real-time and historical vehicle data gives you access to key information, such as location, vehicle health, and driver performance. You can access a wide variety of reports to identify areas of improvement or opportunity.

Ultimately, Mitsubishi Motors Fleet iQ promotes safer and more productive drivers, while helping reduce operating costs. Ensure your business is well-positioned to best serve your customers!

## Start benefiting from connected fleet management today!

Safer  
Operations

Improved  
Productivity

Lower Operating  
Costs

Better Customer  
Service

Simplified FBT  
Reporting

## Gain better visibility of your fleet

### Locate your vehicles in an instant

With our user-friendly map functionality, you can view the location of all your vehicles and their current status on one interface

### Detailed metrics & reporting

Make informed decisions around your fleet and resources with in-depth analysis on KPI's

### Identify inefficiencies in your operations

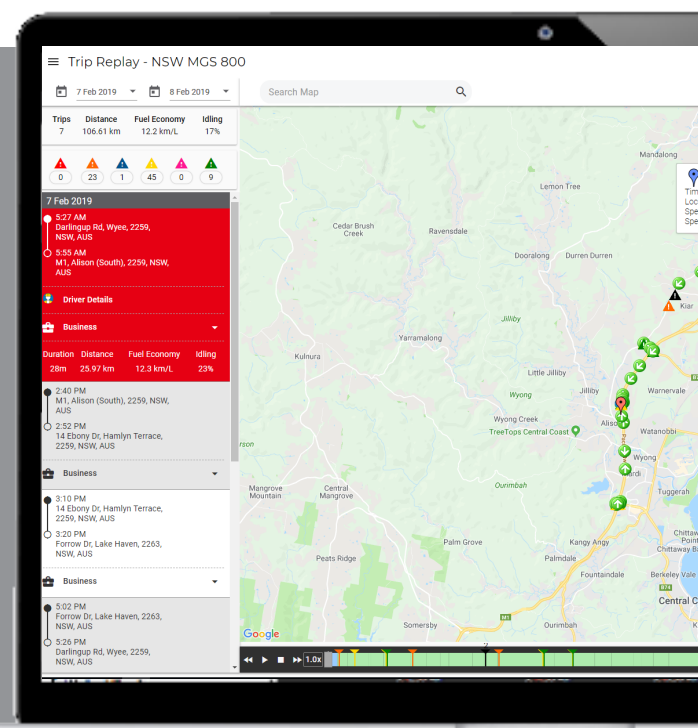

Historical trip data gives you the opportunity to evaluate your fleet utilisation, improve daily route efficiency and ensure the maximum output is achieved each day, reducing overtime costs

### Access from anywhere

No matter where you are, you can access your requirements from our web interface on a mobile device

### Automate your FBT reporting

The Logbook solution provides a simple and convenient way to automate time-consuming Business vs Private vehicle logbooks and calculate your maximum Fringe Benefits Tax return.

\*Engine diagnostics are dependent on vehicle type

## Reduce your total cost of ownership

### Proactively manage maintenance

Create a maintenance calendar and send scheduled and non-scheduled service notifications to drivers or fleet managers, based on time or usage requirements.

### Detect engine issues fast

Electronic Control Module (ECM) integrations\* enable alerts to be triggered when a fault code is detected, so you can quickly address the issue before the damages get more severe.

### Prevent unnecessary vehicle wear & tear

Generate detailed reports to see how your vehicles are being driven by reviewing events such as harsh cornering, braking and speeding.

### Reduce fuel usage

Certain driver behaviour, such as idling and aggressive acceleration, increase fuel consumption, causing your monthly business costs to inflate.

## Generate a safer environment for your drivers and assets

### Driver performance coaching

With routine fleet performance reports and driver scorecards, you can identify areas of improvement for your drivers and reward those who are performing well.

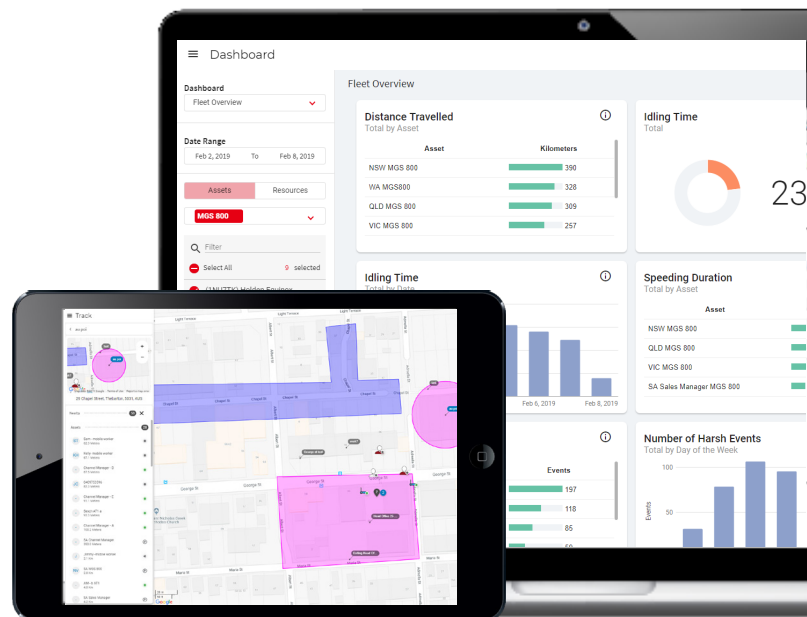

### Accident notifications

Immediate crash notifications and second-by-second data retrieval allows you to take the right steps in a timely fashion.

### Ensure the security of your assets

Get instantly notified on any unwanted asset activity to prevent theft or after-hours use.

## Provide better service to your customers

### Improved dispatch & response times

Utilise live tracking to locate the nearest driver for optimal dispatch and inform your customers of unexpected delays.

### Proof of service

Alert customers to completed deliveries by sending them notifications as the driver leaves their location.

### Provide accurate arrival estimates

Inform customers as to how far away a driver might be from their destination.

The smooth running of your fleet is your ultimate business card. Mitsubishi Motors Fleet iQ ensures your fleet's optimal performance so that you can provide the best customer service to your client base. Efficient dispatching, on-time deliveries, and safer on-road conduct will give your business a competitive edge and help boost profits.

\*Ability to receive Electronic Control Module (ECM) data is dependent on vehicle
